

Furkan Karabulut

Raleigh, NC: Open to Relocation	(984) 900 1360	fkarabu@ncsu.edu	www.linkedin.com/in/furkan-karabulut01/	www.fkarabulut.com
------------------------------------	----------------	------------------	---	--------------------

EDUCATION

B.Sc. in Computer Science North Carolina State University, GPA: 3.2 / 4.0	08/2021 – 05/2024 Raleigh, NC
--	----------------------------------

SKILLS

Language:	Java, C, Python, JavaScript, SQL, TypeScript, CSS, HTML
Tools:	VS Code, Eclipse, Jupyter Notebook, JetBrains (IntelliJ, CLion, WebStorm)
Operating System:	Microsoft, macOS, Linux

WORK EXPERIENCE

Software Engineer (Intern), Live Oak Bank: Projects: Full-stack developer <ul style="list-style-type: none">Served as a full-stack developer, with a focus on RESTful API and Front-endExecuted front-end tasks using CSS, Bootstrap, and ReactExplore Docker, Terraform and AWS	06/2023 – 08/2023 Raleigh, NC
Software Engineer (Part-Time), PQSecure Technologies: Projects: Memory Optimization for data structures <ul style="list-style-type: none">Algorithm level analysis of XMSS and LMSOptimized L-Tree with Merkle tree traversalOptimized XMSS's authentication node update algorithmContributed to 2 patent applications	01/2023 – 06/2023 Remote
Undergraduate Researcher, North Carolina State University: Project: Algorithm Profiling & Efficiency Optimization <ul style="list-style-type: none">Profiled implemented algorithm blocksPerformed optimization on run-time efficiency	06/2022 – 11/2022 Raleigh, NC

PERSONAL PROJECTS

Data Structure:

- Performing running time efficiency, analyzing properties of program, and asymptotic
- Implementing Array and linked memory of lists, stacks, and queues
- Searching and using lists, unbalances tree structures (binary search trees, splay trees)
- Analyzing and implementing sorting (heap, merge, insertion, selection, quick, counting, radix sorting algorithms)

Coffee Maker Application:

- Setting up RESTful APIs with Java and Hibernate to make sure orders and payments go through smoothly.
- Deconstructing client visions into actionable and detailed user stories, capturing both the essential functionalities and quality attributes.
- Conceptualizing and illustrating backend processes through sequence diagrams to bolster scalability and ensure a solid, resilient architecture.
- Engaging in the creation and refinement of frontend navigational structures to heighten the customer journey and interface synergy.
- Structuring a robust MySQL database design, optimized for high-performance data handling and integrity.

PUBLICATIONS AND PATENTS

- Method for computing unbalanced L-Trees efficiently for hash-based signatures used in post-quantum
- A memory efficient method for the implementation of left node authentication in hash-based signatures data structure
